ABOUT VSCR:

The Vienna School of Clinical Research (VSCR) is an international non-profit organisation for continuing post-graduate education of physicians and other experts who are involved in clinical research.

The VSCR has trained more than 5000 experts over 90 countries in the last 10 years. Since 2001, approximately 20 different course modules have been developed, involving an international faculty of around 150 experts from more than 40 different countries. The courses cover all topics relevant to clinical trialists including GCP, trial design and methodology, evidence based medicine, biostatistics, clinical epidemiology, ethics, publication, project management and health outcomes research.

OUR PRIVATE/PUBLIC/ACADEMIC PARTNERSHIP:

Based on partnerships between public bodies (City of Vienna, Austrian Government, European Commission), academic centers (15 universities in Europe, US and Africa) and the private sector (pharma- and other industry), the VSCR has developed an educational programme that aims at optimising clinical research by minimising risk and cost and maximising scientific value as well as ethical and quality standards.

Public and private grants and income from course fees provide the funding for a scholarship programme that allows experts from Central and Eastern Europe, the Middle East, Asia and Africa access to the VSCR educational programme.
